

# ISHA MHATRE

## About Me

Hello, I'm Isha Mhatre, UX Designer from Pune, India. To me, UX design is about humanizing technology. I strive to create seamlessly intuitive experiences to make life simpler for everybody. I've always considered people to be at the heart of the design process and I believe that creative collaboration between design and technology is the magic that takes experiences from good to great! I'm currently a 8th-semester student, pursuing my bachelor's degree in User Experience Design from MIT ID, Pune. I think when we understand human-human interaction, only then can we design efficient human-technology interaction.

I love having conversations with different people; I think that helps me communicate with my team efficiently and bring a surge of energy to every project I work on.

## Experience

TCS Research and Innovation  
Jan 2023 - June 2023
